

Ecology and Conservation of Southeast Asian Marine and Freshwater Environments including Wetlands

By Sasekumar, A. / Marshall, Nissim

Book Condition: New. Publisher/Verlag: Springer Netherlands | A major concern among ecologists in and outside the ASEAN region is the degradation of the environment, and the overexploitation of freshwater and marine resources. There is as yet no indication that freshwater and marine resources are being managed on a sustainable basis, and loss of wetlands, whether freshwater swamps or mangrove swamps, is a major problem in the ASEAN region. Reclamation of mangrove swamps for aquaculture and agriculture seems to be a continuous activity here and the status of marine parks should also be examined in the light of recent resort development activities on small islands. This volume contains numerous recommendations for the promotion of ecological studies and regional cooperation in marine, freshwater ecology and conservation, with special emphasis on the common water masses like the Strait of Malacca, Gulf of Thailand and the South China Sea. | Preface. Ecology of Marine and Freshwaters Including Wetlands. Monitoring of the sea surface temperature in the South China Sea; K.L. Tuen, J.K. Lim. Neap-spring tidal effects on dissolved oxygen in two Malaysian estuaries; B.W. Nelson, A. Sasekumar, Z.Z. Ibrahim. The role of bacteria in nutrient recycling in tropical mangrove and other coastal benthic ecosystems;...
