Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from The Viaduct Works Handbook: Being a Collection of Examples From Actual Practice of Viaducts, Bridges, Roofs, and Other Structures in Iron; Together With Tables of Prices, Weights, and Other Information Useful to Engineers in Designing and Estimating Wrought and Cast-Iron Work The want of a handy book, containing reliable data upon which approximate estimates for bridges, roofs, buildings, railway machinery, c., may be formed, has long been felt, more especially by persons at a distance from home, and having charge of engineering work in foreign countries. Information on these subjects will accumulate in the bands of any one who is called upon to superintend extensive engineering works, and who will be at the pains to make notes of all that appears to deserve attention. The materials forming the following pages have been collected chiefly from work actually carried out at the Viaduct Works, which has passed through the author s hands during a period of about fourteen years while employed there. In order to make the hook more generally useful, such tables have been added as are likely to be required in estimating work of the nature described, with a catalogue of articles manufactured at the Works. The prices mentioned are to be understood as merely approximate; they will, of course, be modified according to the variations in the price of iron, the quantity, mode of payment, c.
