Createspace, United States, 2013. Paperback. Book Condition: New. 279 x 216 mm. Language: English . Brand New Book ***** Print on Demand *****.The Compendium of Infection Control Technologies, Workbook Introduction This is the book that not only assists you in the creation of your Exposure Control Plan, but is also is the only publication that actually becomes part of that plan. Designed to save you hundreds of hours and many thousands of dollars, the Compendium Workbook pairs hundreds of devices with device evaluation forms, dramatically streamlining the task of considering and evaluating workplace engineering controls. Combined with a free membership to our unique website, which gives you hundreds of one-click links for ordering device samples and evaluation materials, the Compendium is not just a book, it is a comprehensive safer device evaluation system. Preventing transmission of infection in the workplace has become one the most important considerations of the current work environment. According to the CDC, exposures to blood and other bodily fluids occur across a wide variety of occupations. Health care workers, emergency response, public safety personnel, and other workers can be exposed to blood and other potentially infectious materials (OPIM) through needlestick and other sharps injuries, mucous membrane, and skin exposures. The pathogens of primary concern are the human immunodeficiency virus (HIV), hepatitis B virus (HBV), and hepatitis C virus (HCV). Workers and employers are urged, no, required, to take advantage of available engineering controls and work practices to prevent exposure to blood and other body fluids. On Nov. 6, 2000, President Bill Clinton signed into law the bloodborne pathogens standard (BBP) by way of the Needlestick Safety and Prevention Act. The law was necessitated by both the lack of adequate engineering controls and the failure of the healthcare industry to take advantage of those controls that did...
