

# Creative Physics Problems for Physics with Calculus: Waves, Electricity Magnetism, and Optics

By Chris McMullen Ph D

Createspace, United States, 2008. Paperback. Book Condition: New. 249 x 201 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This is book is a collection of creative physics problems, which includes a healthy dose of calculus-based problems. No examples or solutions are provided, as this volume of physics problems is intended to be used in conjunction with a textbook. Like textbook problems, answers to selected questions are provided. This can be useful for (i) teachers who are looking for engaging problems to assign or use as examples and (ii) diligent self-learners who are willing to work for the answer and possibly rework the problem a few times (which can be a rewarding strategy in the long run, but does not suit many of today s students who want the information simply injected into their brains). These imaginative problems are designed to: engage the interest of students in this difficult subject, add a little zest to abstract concepts like electric field, challenge students to apply the concepts to involved problems, and encourage students to develop and apply their calculus skills. This includes artistically drawn circuits for capacitors or resistors, electricity problems where students are shrunk by a ray...
