PAPERS FROM THE TORTUGAS LABORATORY OF THE CARNEGIE INSTITUTION OF WASHINGTON (VOLUME 13)

General Books. Paperback. Book Condition: New. This item is printed on demand. Paperback. 54 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1919. Excerpt: . . . IV. FURTHER STUDIES ON THE CHEMISTRY OF LIGHT PRODUCTION IN LUMINOUS ORGANISMS. BY E. NEWTON HARVEY, Of Princeton University. FURTHER STUDIES ON THE CHEMISTRY OF LIGHT PRODUCTION IN LUMINOUS ORGANISMS. By E. Newton Harvey. The results embodied in this paper are the outcome of experiments made upon the dried luminous organs of a small ostracod crustacean, *Cypridina hilgendorffii*, abundant in the coastal waters of Japan. The structure of the luminous cells has been well described by Dahlgren in the Journal of the Franklin Institute for June 1916, and by Yatsu (Jour. Morph. , vol. 29, p. 435, 1917). These cells contain the luminous substances concerned in the production of light, which are projected into the sea-water as a luminous secretion. This paper deals particularly with the chemistry of the luminous reaction. It will be considered in two sections, viz: I, reversibility of the photogenic reaction in *Cypridina*. II, the chemical nature of *Cypridina* luciferin and *Cypridina* luciferase. Much of the work was performed in the Zoological Laboratory, Imperial University, Tokyo, Japan, and it gives me pleasure to acknowledge the kindnesses of Professors Ijuma, Yatsu, Watase, and Goto during my stay at the university. I am also deeply indebted to Professor C. Ishikawa, of the Agricultural College, Tokyo, for much assistance in collecting material, and I express my sincere thanks for his interest in my work. I. REVERSIBILITY OF THE PHOTOGENIC REACTION IN CYPRIDINA. In a previous paper on the question of animal luminescence¹¹ have described...
