LAP Lambert Academic Publishing Mrz 2014, 2014. Taschenbuch. Book Condition: Neu. 220x150x5 mm. This item is printed on demand - Print on Demand Neuware - Recent financial events have emphasized the need for an understanding of financial decision-making, financing instruments, and tools used in financial and investment management. Although there are a number of books on the subject of financial management, a few of them are fairly comprehensive. Nevertheless, the present book is expected to serve better the interest of the readers who are not well versed in the terminology of advanced financial management. The reason is that the explanation has been made greatly lucid, with a good number of examples in order to suit the needs of such readers. Moreover, the volume of the text has intentionally been limited to suit the time framework of the readers. The present book contains five chapters. The first one presents an Overview of Financial Management. The second explains Capital Budgeting. The third chapter discusses the Cost of Capital. The fourth chapter discusses the Working Capital Management. Finally, the fifth chapter examines the Dividends Policy. 88 pp. Englisch.
